"And should there be a sudden loss
of consciousness during this meeting,
oxygen masks will drop from the ceiling."

FIX THIS !

* Take responsibility

* Correct all errors in ADM AND Retransmit

* Go to the MEPRS clinics and correct the

  ADM pick lists to prevent future errors

CORRECT CODING SHOULD BE:

- **E&M: 99499**
- **Diagnosis: V04.1**
  - **or V06.8 if combinations of vaccines given**
- **Injection CPT code: 90471**
- **Vaccine CPT code: 90749**

- DO NOT EVER CODE: **050** as a diagnosis.
- 050 means the person HAS Small Pox!

The Following Slides…

- Detail every encounter from the SIDR & SADR for FY03 & FY04 that erroneously were coded with the Small Pox disease “050” instead of the vaccination
- Every single one of these encounters has to be corrected and retransmitted
- Enough information is provided to tell you when and where these encounters occurred
- HIPPA prevents us from publishing any PHI in this format
- So you must pull the data at your MTF for more exact encounter numbers or SSN’s
